Facts Fossils 1000 Facts On - sono2014

100 facts fossils Over the years, paleontologists have found many thousands of fossils from creatures long extinct, and from early human and pre-human cultures. Scientists examine fossils to piece together information from eras past, and some fossils find use in everyday life.

10 Facts About Fossils | Sciencing

100 facts fossils Single teeth or bones are body fossils, too. Footprints, tracks, eggs, and fossilized excrement are trace fossils. Fossils give us a peek into the lives of the people, plants, and animals that lived long ago. They tell us where they lived, how they lived, and what the world was like around them.

Fossils and Rocks - SMCPs - Schools

100 facts fossils fossils scientists are able to link different rock layers from around the world, containing the same fossils to one geological time period. Fossils also change overtime. Through studying these changes in the fossils, scientists are able to determine whether one rock layer containing certain fossils is older or

younger than another.

Fossils: teacher notes, fact sheets and student activities

100 facts fossils Worksheet: What are fossils? The word "fossil" is from the Latin word "fossilis" meaning "to dig". Fossils are the remains or evidence of prehistoric plants and animals that have been preserved in rock. Most of-ten, the hard, durable body parts such as bones, teeth, or shells are preserved. However,
