### **guide domain names pdf**

guide domain names A domain name is a label that identifies a network domain: a distinct group of computers under a central administration or authority.. Within the Internet, domain names are formed by the rules and procedures of the Domain Name System (DNS). Any name registered in the DNS is a domain name. Domain names are used in various networking contexts and for application-specific naming and addressing ...

guide domain names The Domain Name System (DNS) is a hierarchical and decentralized naming system  
for computers, services, or other resources connected to the Internet or a private network. It associates  
various information with domain names assigned to each of the participating entities. Most prominently, it  
translates more readily memorized domain names to the numerical IP addresses needed for locating and ...
