An Introduction to Statistical Learning: with Applications

the elements of statistical learning data mining inference and prediction second edition Most quantitative studies follow these steps: 1) Select the target population, 2) Select the accessible population, 3) State the eligibility criteria, 4) Outline the sampling plan, and 5) recruit the sample. Most qualitative studies might evolve this way: 1) a general idea of where and with what population to start and by soliciting a few cases through convenience procedures, 2) successive
